SUMMARY

I'm a passionate software engineering student currently in my 3rd year at SZABIST. I enjoy building real-world applications, exploring new technologies, and continuously improving my skills in software development.

PROJECTS / Expereience

AL Khidmadt Foundation (INTERN)   July 2025 - SEP 2025

- Built a Board Room & Vehicle Reservation Portal using HTML, CSS, JS, Node.js, and MySQL.
- Collaborated with the IT team to design secure backend APIs and optimize database queries, ensuring real-time reservation tracking and seamless user experience across multiple departments.

Weather Forecast Application (Java + API)
- Integrated Open-Mateo API to display real-time weather data.
- Built user interface using Java Swing.
- Displayed Temperature, Wind-speed and Humidity.

Crypto Wallet UI/UX Design (Figma)

- Designed an intuitive and secure user interface for a crypto wallet application.
- Created wireframes, user flows, and interactive prototypes.
- Focused on user experience, accessibility, and responsive layout.
- Implemented features like transaction history, real-time balance updates.

Clothing Website (HTML & CSS)

- Built a clothing e-commerce website using only HTML and CSS.
- Implemented homepage, product catalog, and contact form.
- Focused on clean design, layout, and cross-device compatibility.

EDUCATION

Bachelor of Science in Software Engineering SZABIST, KARACHI SINDH   Sep 2023 - SEP 2027

Expected Graduation: 2027

ADDITIONAL INFORMATION

- **Languages:** Java, C language.
- **Database**: MySQL
- **Web:** HTML/CSS
- **Tools:** Git, Vs Code, Figma
- **Concepts:** APIs, OOP, Basic Data Structures, Database
- **Spoken Languages:** English, Urdu, Sindhi
